

## MP 5 Report

RR:

Quantum Number	Average Wait Time	Average Response Time
2	10.1	34.6
4	17.3	34.3
8	22.2	29
16	22.6	27.5
32	22.6	27.5

MLFQ:

Quantum Number	Average Wait Time	Average Response Time
2	5.8	1.8
4	5.8	1.8
8	5.8	1.8
16	5.8	1.8
32	5.8	1.8

Our Average Wait Time and Average Response Time is the same for each quantum number because our MLFQ doesn't exactly work properly. It doesn't show the different quantum numbers when printing out.

We had the most difficulty with the MLFQ, but we finally got it to print something out. It's still not all correct. There are definitely a lot of areas that we could improve in. To run the program, type make to make sure it compiled everything and then type ./schedule and it will tell you the different options we used the file Task.txt for our data.
